PCR Mandates

Store Drop-Off

Recovery Technologies

Inclusion & Representation

Collaboratives are how SPC member companies work together to understand key challenges, determine industry best practices, and pilot solutions to the most pressing design, material, and infrastructure problems.

The shared goal of all SPC Collaboratives is to help guide SPC members and the industry in navigating and addressing sustainable packaging challenges and identifying opportunities.

We've been leading collaborative working groups for over 15 years.

Take advantage of our portfolio of resources rooted in Our Pillars.

Our supportive staff of subject matter experts, and thought leaders is driven to create positive change through guidance and opinions backed by science and data.

Explore our Knowledge Library, providing tools & insights to make your packaging sustainable.

From foundational tools, to deep dive insights, the SPC Knowledge Library is asynchronous and self-paced, free and accessible to SPC members.
